

Auto Owners Insurance

Company Website: www.aoins.com

Position Title: Business Analysts in Commercial Lines Web
 Development Department

Opportunity Location: Lansing, MI

Required Major: Insurance / Risk Management

Additional Coursework: Management Information Systems or Information Technology

Other Preferred Skills: Quick learner, strong analytical skills, inquisitiveness and problem solving skills, and time management skills

Position Description:

There are new positions available in the Commercial Lines Web Development department here at Auto-Owners Insurance Company. Specifically, we are looking for May graduates interested in re-locating to Lansing, Michigan and working as a Business Analyst.

Our Business Analysts work very closely with our Information Technology department creating both the front end systems (web based) used by our agency force today, as well as creating new back end systems used to produce the policies. Prior to working as a Business Analyst, we will provide training in our Commercial Lines Underwriting department. Upon completion of the training, the associates will return to our area and begin working with a project team developing our systems of the future.

Please email your resume to Debbie Babcock, dababco@ilstu.edu, at the Katie School if you are interested.
